What is Maker Faire?

Maker Faire is an all-ages gathering of tech enthusiasts, inventors, garage tinkerers, science clubs, artists, startups, crafters, and hobbyists. These “makers” come to a Maker Faire to show what they have made and share what they have learned. It is a forward-looking showcase of makers exploring new forms and technologies in science, art, engineering, performance, and craft.

Philadelphia Mini Maker Faire is a family-friendly, hands-on event where makers, crafters and inventors exhibit their creativity and invite you to tinker, play, and be amazed by their creations.

Glimpse the future and get inspired!

Featuring 100+ makers, including:
